

### Image-quality, Durability, and Functionality Beyond Your Expectations

### A Revolution in Remote Visual Inspection has arrived...

Introducing a videoscope system that combines portability with performance; modularity with reliability; simplicity with advanced functionality; ease of use with durability. Only one product does this — the IPLEX EX

# Rugged and Durable Designed to withstand the bumps, drops and falls of the everyday industrial workplace.

The IPLEX FX introduces new levels of durability to industrial videoscopes with its shock-resistant case design and wear-resistant scope exterior. Adding "strength-of-construction" to a frequently used, job-essential tool produces one tough, reliable and long-lasting piece of industrial inspection equipment.

### **Cast Magnesium-alloy Chassis for Impact Resistance**

The main component of the IPLEX FX base unit chassis is magnesium — renowned for its strength and light weight. A typical material used for industrial environment equipment, magnesium was chosen to provide the impact resistance and solid base that withstands the knocks and bumps that commonly occur to industrial videoscopes. In addition to

a crush-resistant chassis each corner is protected by rubber bumpers, further softening a drop and maximising product reliability while reducing potential for damage. The IPLEX FX survived the repetitive 4-foot drop test for compliance to MIL-STD 810G.\*

The chassis corners are protected by rubber bumpers to reduce the impact force created by the typical bumps and knocks of an industrial workplace.

The crush resistant cast magnesium chassis is the core of the IPLEX FX mechanical design strength. The extra durability in construction results in extra protection against equipment damages.

\* Military Standards (The United States Defense Standard) is used to help achieve standardisation objectives by the U.S. Department of Defense.

### **Abrasion Resistant Insertion Tube**

The most critical component of any remote visual inspection tool is the insertion tube. It performs the basic requirement of accessing the inspection area and frequently navigating through narrow paths with abrasive and rough surfaces. The IPLEX FX insertion tube is the latest Olympus IPLEX design, with enhanced crush protection and fray resistance. Strength was added to the insertion tube without compromising the

flexibility and ability to navigate through the most difficult inspections. As with all of our IPLEX products, the IPLEX FX is designed with the Olympus Tough TaperFlex graduated stiffness design for maximum scope flexibility towards the scope end. The IPLEX FX scope unit is available in three insertion tube diameters: 6.0 mm, 4.0 mm and a 6.2 mm model with internal working channel.\*

To navigate through tight bends or Articulation wires and electronics corners, minimum bend radius only. With LED illumination at the and shorter rigid tip sections are scope tip, fiber optic bundles are essential design criteria for our not necessary. scope tip, optics and tip adaptors. TaperFlex coil features graduated flexibility for easy High density outer braid for scope manoeuverability maximum wear resistance and navigation. and durability.

The simplicity and portability of Olympus videoscopes has seen their usage extend to areas not considered 'traditional' application areas. Go to these harsher environments, but take a system designed for the job... IPLEX FX.

### True Portability — Compact, Lightweight, Battery-powered

Power is provided to the IPLEX FX by an internally mounted, Lithium-ion battery which provides over two hours run-time. The compact size of the IPLEX FX makes portable operation a reality — either body-wear the lightweight system or place it on a surface and allow the non-slip, rubber corners to hold it in place while you carry out your inspections.

### **Temperature Resistance**

The IPLEX FX scope units are resistant to insertion in higher temperature environments — now 100° C meaning that inspections can take place sooner as you won't need to wait as long for the area to cool. Additionally, a temperature sensor provides a two-stage visual warning in order to prevent overheating.

High temperature warning display

### **Resistance to Harsh Environments**

To prevent the ingress of debris, all mechanical joints are hermetically sealed and input/output connectors are covered.

The inventive design of the FX has removed the need for a cooling fan, and therefore no air intake is required. This results in even greater environmental resistance.

IPLEX FX under dust resistance testing

IP55 water resistance testing

<sup>\*</sup> Military Standards (The United States Defense Standard) is used to help achieve standardisation objectives by the U.S. Department of Defense. Reference page 17 for MIL-STD compliance details.

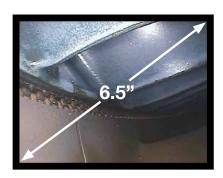

With our leading-edge optical and imaging technology, Olympus understands

### what is needed to deliver accurate and colour-rich images. This experience continues to be transferred to industrial inspection equipment.

### **Daylight-view High Resolution LCD Monitor**

Clear observation in direct sunlight is made possible with the new 6.5-inch daylight-view LCD monitor — the minimum recommended screen size for accurate and reliable observation of fine detail. Colour reproduction and contrast are maintained, ensuring inspections are not compromised when working outdoors. The environmental resistance of the LCD also matches that of the IPLEX FX system.

### **Optimised Images with Interchangeable LED Tip Adaptors**

To provide high quality, faithfully reproduced images and accurate colour, the IPLEX FX features an outstanding optical system, noise reduction and our unique WiDERTM (Wide Dynamic Extended Range) image processing technology. WiDER™ delivers bright, contrast-balanced images across the entire depth of field.

Image at standard gain setting.

Image with WiDER™ gain applied. WiDER™ gain brightens the darker areas while maintaining the light level and details shown in the bright area.

### **New LED Illumination with SmartTip™ Optical Adaptors**

Now the light source is in the SmartTip™ optical adaptor with LED's providing illumination, meaning lamp changes are no longer required. This revolutionary new design contributes to reduction in overall system size and power consumption, while maintaining the ability to change direction of view and field of view. This design applies to SmartTip™ optical adaptors for both standard inspections and Stereo Measurement for all three insertion tube diameters. Additionally, Hi-Beam mode boosts illumination up to 2x for expanded inspection capability.

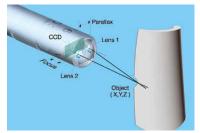

The IPLEX FX can perform almost any kind of inspection thanks to a wide range of interchangeable scopes, including models up to 18 m long and one with a working channel. More than just another inspection tool, the IPLEX FX is a reliable, feature-rich system capable of precise, real-time measurement and foreign object retrieval.

### **Measurement Accuracy**

The IPLEX FX uses Stereo Measurement technology for easy defect measurement at any target angle. With the addition of the unique Multi and Offset Measurement modes, the IPLEX FX offers a more intuitive measurement environment with eight different modes for accurate evaluation of most inspection targets. Multi Measurement mode is a quick two-point defect identification technique that simultaneously calculates point-to-line, area and distance results. Stereo Measurement tip adaptors are available in direct and side view models for all three insertion tube diameters.

IPLEX FX Stereo Measurement Modes

Multi Measurement mode

Our unique Spot-Ranging™ feature is the industry's only real-time tip-to-target distance measurement tool. As a rule, a videoscope's measurement accuracy depends on the scope's distance from the target. With the IPLEX FX, the user can easily determine whether the scope tip is close enough to calculate the most accurate measurement on the first try.

### **Interchangeable Scopes**

The IPLEX FX offers a range of interchangeable scopes, allowing you to choose the right one to fit the job. This means a single IPLEX FX can be configured for a variety of inspections. Scopes are available in diameters of 4.0 mm and 6.0 mm and in various lengths ranging from 2 m to 18 m.

### **Foreign Object Retrieval**

Adding to the array of versatile IPLEX FX benefits is a 6.2 mm diameter scope featuring an internal working channel. Six retrieval tools allow you to remove foreign objects from inside inspection areas — ideal for helping avoid costly overhauls — and perform hook and drag inspections in engines. Both forward and side view Stereo Measurement tip adaptors are also available with the working channel scope, providing a complete inspection solution.

These days, inspections don't end when you've packed up your videoscope. It's just the beginning. The IPLEX FX is equipped with an array of recording options and external interface solutions for a seamless transition to post-inspection analysis and archiving.

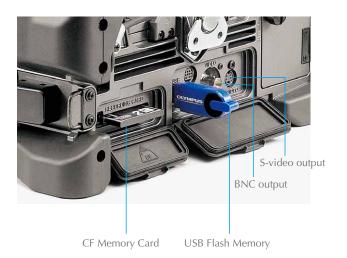

### **ImageNotepad™ for Extended Image Annotation**

Information frequently needs to be added to videoscope images to aid post-inspection diagnosis and create reports. IPLEX FX makes this process an integral part of inspections with easy-to-use ImageNotepad<sup>TM</sup>. Fields for titles and text are available for entering key words and phrases to allow extended descriptions of inspected objects. Additionally, text input is simplified by display of a list of predicted words each time a letter is entered. This valuable information is immediately accessible as part of each image when inspection data is transferred to a computer.

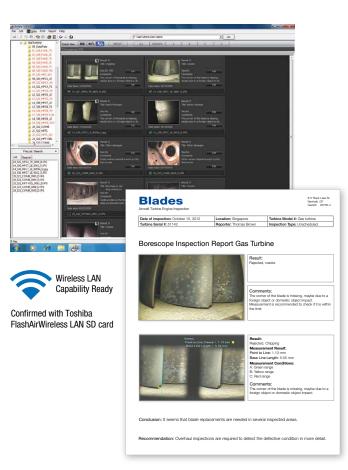

### **Inspection Recording Options**

Archiving, sharing and reporting inspection results are made simple with the IPLEX FX. It features still image and movie recording to internal memory, removable compact flash cards or USB flash drives. Due to the rigours of the industrial inspection workplace, the IPLEX FX is designed to store images on solid-state media devices, ensuring that valuable data is not lost due to the instability of storage media with movable parts. All file formats are Windows-compatible (still format: JPEG, TIFF; movie format: AVI) and can be easily used in reports or attached to e-mail for instant sharing of inspection results. The IPLEX FX is also compatible with other recording devices via S-video and composite video outputs. For more efficient on-site viewing, the IPLEX FX's movie viewing functions now include pause, fast-forward and rewind.

### InHelp™ Inspection Assist Software

InHelp, the optional inspection data management and reporting software streamlines many aspects of remote visual inspections with the IPLEX FX. The software greatly improves work efficiency and simplifies inspections by organising stored images on the IPLEX FX and generating detailed inspection reports on a PC with simple click-operation.

With the IPLEX FX quick access control buttons and intuitive software menu, inspectors of all skill levels can easily utilise the advanced software features that produce accurate and confident inspection results.

### **TrueFeel™ Scope Tip Articulation**

The IPLEX FX features TrueFeel™ scope tip articulation for power-assisted manual articulation and precision control. With instant movement and accurate feel, the user takes full control of the scope position resulting in easier and faster inspections.

### **SmartTip™ Automatic Recognition Technology**

The IPLEX FX introduces the industry's first intelligent tip adaptors. SmartTip $^{\text{TM}}$  optical tip adaptors are uniquely identified, allowing instant system settings change to match the tip adaptor optics and features without the need for manual user selection.

### **Quick-access Hot Buttons**

The all-new controller maximises the use of buttons, levers and joysticks for quick access to all essential menu functions. Image enhancements, recording buttons and measurement features are among the many basic-to-advanced features that are at the tips of your fingers.

### **Dual Recording Button**

The FRZ/REC button located on both sides of the IPLEX FX controller accommodate both left-handed and right-handed users.

### **One-handed Scope Control and Interface**

The ergonomic 750g scope handset is comfortable to use even during prolonged inspections and provides quick access to all frequently used menu commands. The unique IPLEX FX dual joystick design separates tip articulation and menu navigation, providing a more intuitive and comprehensible interface.

	Video recording	Recording format AVI format, Motion JPEG compression, Windows Media Player compatible						
	Audio recording	Recording format WAV format, 60 sec max.						
	Distance	Distance between two points.						
	Point-to-Line	Perpendicular distance between a point and a user-defined line.						
	Depth	Orthogonal depth/height distance between a point and a user-defined plane.						
tereo neasurement	Area/Lines	Multiple point circumference and area measurement						
	Profile	Plot of cross section between two points						
	Multi	Multiple measurements (distance, point-to-line, area and line) between two points						
	Offset	Point-to-Line measurement with a parallel line passing on a measurement point						
Scaler measure	ment	Distance between two points based on a known measurement in the same plane.						

### **OPERATING ENVIRONMENT**

Operating temperature	Insertion tube	In air: -25 to 100°C, In water: 10 to 30°C
	Other parts	In air: -21 to 49°C
Relative humidity	All parts	15 to 90%
Liquid resistance	All parts	Operable when exposed to machine oil, light oil or 5% saline solution.
Waterproofing	Insertion tube	Operable under water with viewing tip adaptor attached.*1  Not operable underwater with stereo measurement tip adaptors.  Water pressure resistance:  IV84 series: Up to an equivalent to 3.5 m in depth  IV86 series: Up to an equivalent to 7.5 m in depth
	Other parts	Operable in blowing rain conditions (Battery compartment must be closed). Not operable underwater.

<sup>\*1.</sup> Excluding IV8675X1

**MIL-STD COMPLIANCE**The operating environment performance is confirmed by the following MIL-STD-810F/G and MIL-STD-461F under battery operation.

Туре	Method
Vibration	MIL-STD-810F, Method 514.5, Procedure I
Shock (Drop)	MIL-STD-810G, Method 516.5, Procedure IV
Rain and Blowing Rain	MIL-STD-810F, Method 506.4, Procedure I
Humidity	MIL-STD-810F, Method 507.
Salt Fog	MIL-STD-810F, Method 509.4.
Blowing Dust	MIL-STD-810G, Method 510.4, Procedure I
Icing/Freezing Rain	MIL-STD-810F, Method 521.2.
Electromagnetic interference (EMI)	MIL-STD-461F, RS-103, (Radiated susceptibility test for non-metallic below deck shipboard conditions).
Explosive atmosphere*1	MIL-STD-810F, Method 511.4, Procedure I

<sup>\*1.</sup> IPLEX FX is not explosion-proof.

### **Accessories**

### Rigid sleeve sets

MAJ-1737 (for 4.0 mm dia. insertion tube) MAJ-1253

(for 6.0 or 6.2 mm dia. insertion tube)

Rigid sleeve sets are available for 6.2 mm, 6.0 mm and 4.0 mm scopes. Each set consists of three rigid sleeves — 250 mm, 340 mm and 450 mm lengths.

### Handheld controller holder

Allows the controller to be affixed to a tripod, making it useful for prolonged inspections.

### **Optical tip adaptors**

The IPLEX FX has a complete and comprehensive range of tip adaptors to meet the optical requirements of any application.

### Guide tube for inspection of JT8D engines

Provides a second movable joint for incredibly flexible control, which is ideal for inspecting the combustion chamber of JT8D engines. Available on the 2 m and 3.5 m scopes.

Note: Pratt & Whitney approved for JT8D engine inspection.

### **Retrieval tools**

An assortment of versatile tools is available to remove foreign objects and facilitate inspections of complicated engines.

Magnet Snare Alligator Basket Grasper

### Guide tube for long scope

MAJ-1824-50 (for IV8650) MAJ-1824-75 (for IV8675) MAJ-1824-120 (for IV86120)

MAJ-1824-180 (for IV86180)

Protects the scope and assi

Protects the scope and assists in smooth entry when inserting it into a wide pipe. Available on scopes in lengths from 5 m to 18 m.

### **Lithium-ion battery** NP-L7S

### **Battery charger**

JL-2PLUS/OL-0 (115 V type) JL-2PLUS/OL-1 (220 V type)

The carrying case is designed to carry one battery charger and two batteries. With a full set of batteries, the IPLEX FX system is ready for inspection anywhere, anytime.
